All-new Dulux Weathershield Tile

PRODUCT DESCRIPTION:

Ordinary exterior paints cannot protect sloping tile roofs and exterior brick walls from algae and fungus attacks. Dulux Weathershield Tile has a strong latex film which gives exterior tiles, bricks and stones a rich sheen and protection from algae, fungus, cracking and peeling on hard surfaces.

Dulux Weathershield Tile is also available in a Clear variant. Its dual technological edge preserves the natural look of tiles, bricks and stones, at the same time providing protection from algae and fungus.

Dulux Weathershield Tile is compliant with the requirements of Bureau of Indian Standards (IS: 5411, Part B) for exterior emulsion paints.

PRODUCT FEATURES AND BENEFITS:

- 1. Tile Protect Technology.
 - a. Water Beading effect that forces rainwater to create beads and minimize the impact

b. Tough Microbond latex film that protect against vertical impact of rainwater

2. Fungal Guard

- Powerful Fungal Guard formulation for protection against black spots
- 3. Water repellent technology
- Water repellent film protects from water to penetrate to Tile substrate
- 4. Colour Lock technology
- International quality pigments that hekp us maintain the colours and long lasting glow of tiles & bricks
- 5. Clear variant available to preserve the natural look

PRODUCT RELATED INFORMATION:

Film Composition: Pigment : Light fast Non-Lead/Chrome pigments Binder : Acrylics Copolymer Latex Solvent : Water Volatile Organic Compound (VOC) level for White & Bases: 10-40 gm/litre VOC will vary for shades depending on colourant quantity Gloss/Sheen Levels: Available in Mid-Sheen and Clear variant Flash Point (IS 101/1987, Part 1, Sec 6): Non Flash Stability of Thinned Paint: Use within 24hrs of thinning

Dry Film Thickness(Calculated): 75-90 microns at coverage of 50-60 sqft/litre

Practical Coverage:

The spreading capacity of this product will vary considerably according to the roughness and porosity of the surface.

- On smooth surface of low porosity : 50-70 sqft/litre/2coats
- On smooth surfaces of high porosity : 35-55 sqft/litre/2coats
- These figures are only an approximate guide. Due to variation in different surfaces, the coverage may vary. It is recommended to do a coverage trial before finalizing the paint requirement.

Pack Size:

Available in 1L , 4L, 10L and 20L

APPLICATION RELATED INFORMATION:

Before application, read the Safety, health and Environment information and the Precautions given below:

Application tool:

• Suitable for application by brush or roller

Surface Preparation:

- Ensure surface is thoroughly clean, dry and free from all loose dirt, chalk, grease, fungus, algae and flaking paints. This can be achieved by brushing with a wire/stiff coir brush, followed by water jetting if required. Avoid inhalation of dust during cleaning of the surface
- For areas severely affected by algae or fungus application of ICI Pre-treatment Coat is recommended
- It is not recommended for use over-glazed titles

400 ml

1 Itr.

Priming:

• Do not apply any kind of putty or primer

- Dilute 1 litre of paint with 300-400 ml clean water
- In case of deep colours, dilute 1 litre of paint with a maximum of 250ml clean water

(An additional coat may be required for full opacity)

TileShield Clear

• Do not dilute. Apply as supplied

Finishing:

- Stir thoroughly before use
- Apply 2-3 coats of DuluxTileShield with 4-6 hours between coats

Drying Time: (Single coat at standard thickness):

- Touch dry : Up to 2 hours
- Recoat : 4-6 Hours

Drying time may vary according to temperature and humidity. For instance, dying time will be significantly longer in cold, damp conditions.

SAFETY, HEALTH AND ENVIRONMENTAL INFORMATION:

- Treatments such as sanding, burning off etc of paint films may generate hazardous dust and/or fumes.
 Wet sanding/ flatting should be used wherever possible. Work in well ventilated areas. Use suitable personal protection equipment. Wear suitable gloves
