Brush	For normal use thinning is not usually necessary. If required add up to 10% by volume with Colourland 1000 thinner.
Roller	For normal use thinning is not usually necessary. If required add up to 10% by volume with Colourland 1000 thinner.
Conventional Air Spray	Thin with 10% - 20 % by volume with Colourland 1000 thinner and adjust to requirement.
Airless Spray	Ready for use. Thinning is not usually necessary.

Surface Preparation	
Wood	Wood must be dry and free from grease, dirt and other contaminants, smoothen surface with suitable grade sand paper and dust off before application of undercoat and paints.
Metal	Surface must be dry and free from grease, dirt and other contaminants. Steel surfaces should be sanded or wire-brushed to remove mill scales and rust. For best result steel surfaces should be prepared by hand or power tool to BS 7079 Part 1: 1989 S T 3 standard. Galvanised and Aluminium surfaces should be cleaned and degreased, apply an appropriate Etch Primer to ensure good adhesion.
Previously Painted	Remove all loose, defective and unstable paint film. Rusted and defective areas should be sanded and feather edged and spot primed with Colourland Zinc Chromate Primer before applying subsequent coatings.
